

ASG River Avon Fish Counter Update October 2009

Data so far

	Rod Catch (BM)	Net Catch	Counter figure
2006	144	55	1319
2007	124	55	1135
2008	67	65	810
2009	71	65	609 (estimate to date)

	Percentage salmon of fish >45cm
1 st Feb to 9 th June	88% salmon
9 th June to present	76% salmon

- Only approximate estimate so far
- However 'leakage' has been low due to low flows
- Efficiencies of the counters are generally good during low flows.

Knapp Mill MDF's

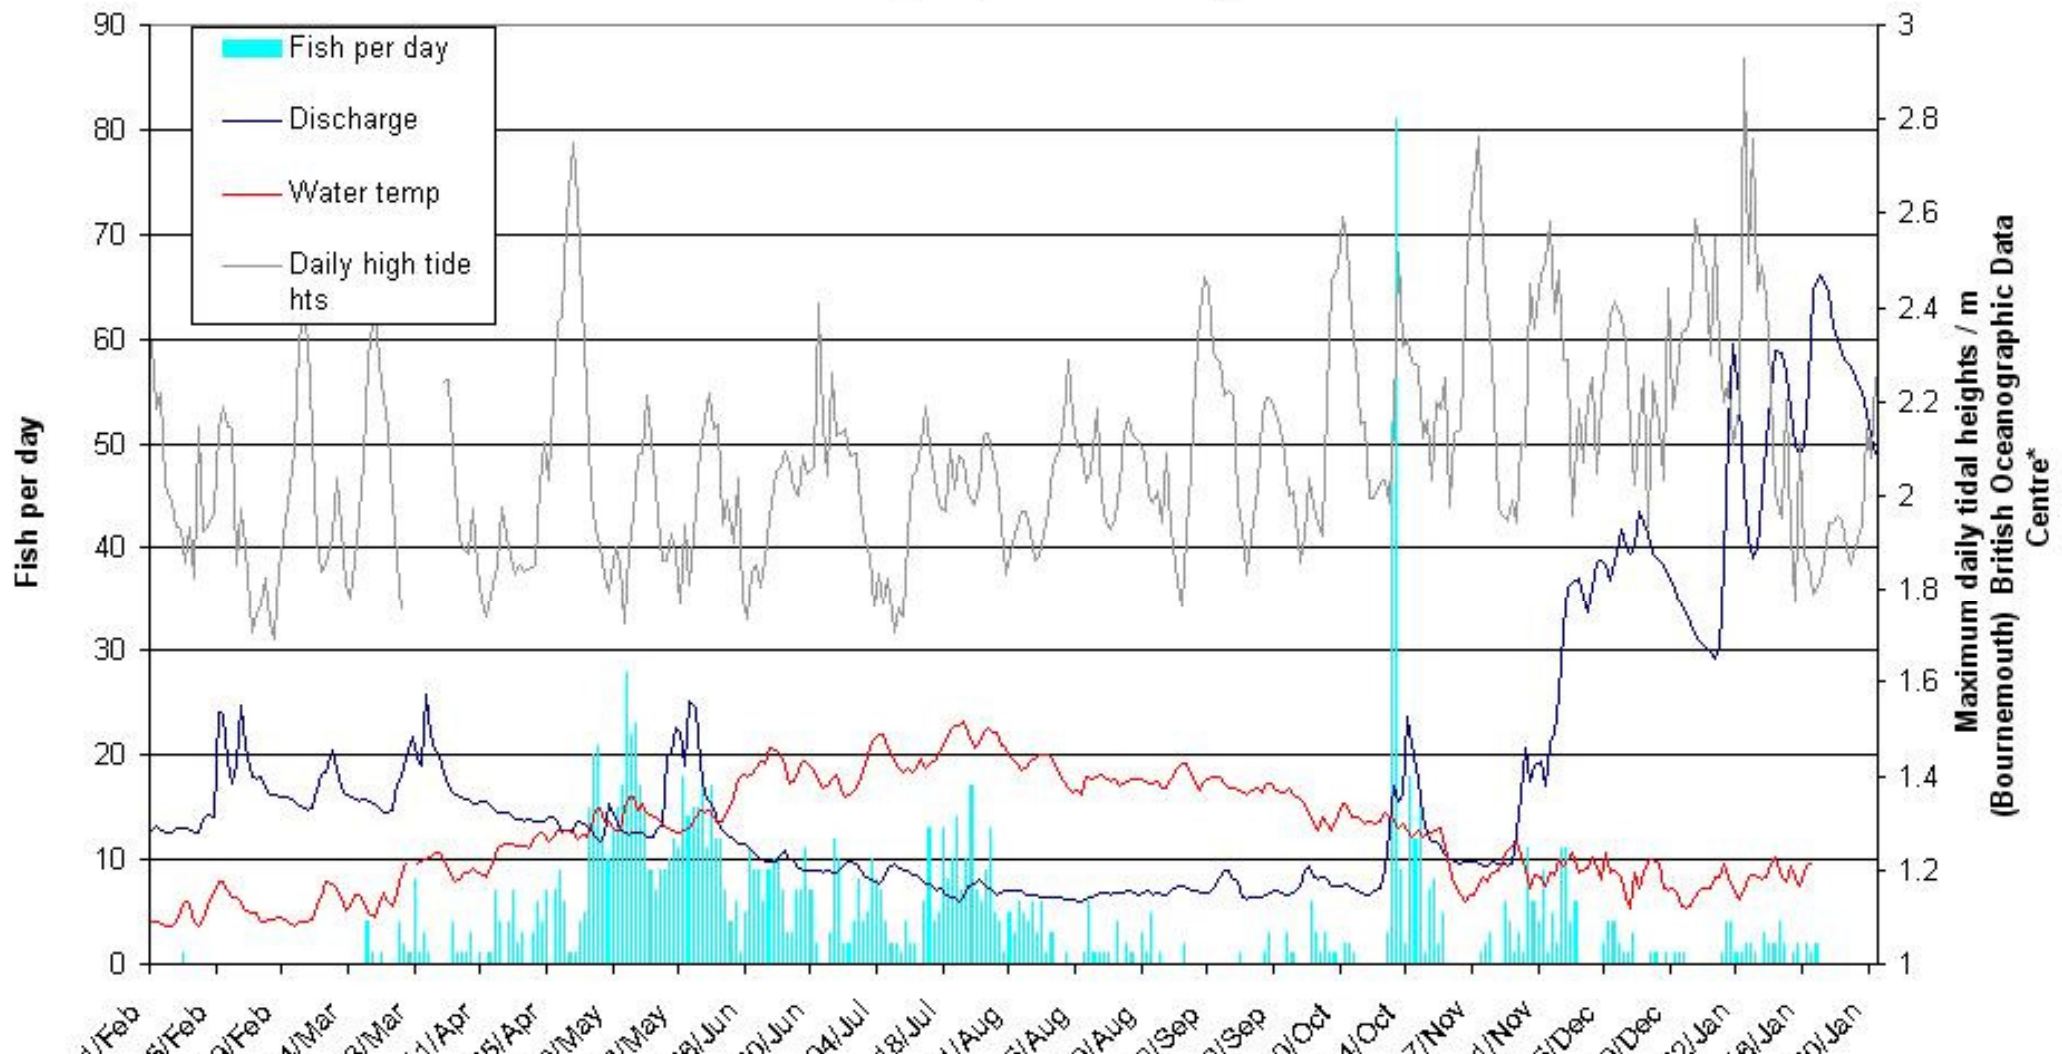

Knapp Mill Water Temperatures

2006 Data – simular flow summer

2006 / 2007 Upstream fish per day, river flow and water temperature at Knapp Mill and daily high tide heights (Bournemouth)

New counters

- Now all hatches on Great Weir have counters
- Should give more accurate count under high flows

New DO probe at Knapp Mill
